Tools Used:

- Java
- Eclipse
- Canva
- Draw.io

Description: A program that can create contacts of people and write them to a file
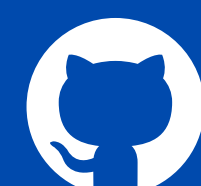

Code

```java
12     PersonContact(){ }
13
14⊖    PersonContact(String name, String dateOfBirth, String desc, int numberOfRe
15         this.dateOfBirth = dateOfBirth;
16         this.desc = desc;
17         this.numberOfRelatives = numberOfRelatives;
18     }
19
20⊖    public void isEmployed(boolean working) {
21         if (working) {
22             System.out.println("They are employed");
23         } else {
24             System.out.println("They are not employed.");
25         }
```
